Western Australia hosts world-class gold deposits

- Western Australian gold production for 2018–19 was 7.5 million ounces, bringing the cumulative gold production for the State to 289 million ounces
- New mines recently coming into production include Gruyere JV (Gold Fields / Gold Road Resources) and Jaurdi (Beacon Minerals), both located within the Yilgarn Craton
- Maiden mineral resource estimates have been announced for several projects including Plutonic Dome (Trident deposit), Grants Creek (Perseverance, Star of Kimberley deposits) and Horse Well (Warmblood, Dusk til Dawn deposits). Maiden reserve announcements were also made for the operating Beta Hunt Underground and King of the Hills mines
- Updated resources estimates were announced for several projects including North Widgiemooltha (Darlek, Flinders, Hronsky, West Oliver South deposits), Warrawoona (Fieldings Gully, Copenhagen, Klondyke, Coronation deposits), Katanning (Jackson deposit), Thunderbox (Kailis deposit), Carosue Dam (Karari Underground), Laverton (Beasley Creek, Telegraph deposits), Davyhurst (Sand King, Missouri, Riverina deposits), Yamarna (Renegade deposit), Mt Magnet (Eridanus deposit), Yandal Bronzewing (Mt Joel deposit), North Telfer (Chicken Ranch, Tim's Dome deposits)

Gold prospectivity of Western Australia

- Current known resources and reserves total 221 million ounces, including 28 projects containing more than 2 million ounces each
- There are successful large mining operations in the Yilgarn Craton (e.g. Gruyere), Albany–Fraser Orogen (Tropicana), Paterson Orogen (Telfer) and the South West Terrane (Boddington), demonstrating that Western Australia is prospective for significant gold deposits in both traditional and underexplored regions, with potential for more discoveries in a range of geological environments
